

Handcrafted Custom Mantles

**WYOMING LOG HOME
MANUFACTURING CO.**

Our mantles are made by hand with the same standard of quality that we use on our log homes. Each piece is custom fitted for its desired appearance and application. The pieces are hand sanded and finished to bring out the unique beauty of the grain and character.

While we use mostly lodge pole pine and spruce, we can make any material to fit the specific dimensions and needs. When affixed to a fireplace, these mantles are extremely strong and ridged.
