

Tongue & Groove and Rafters

WYOMING LOG HOME
MANUFACTURING CO.

~Tongue and Groove

The Tongue and Groove that we use is of the same material as our logs, spruce and lodge pole pine. It has the same variety of organic colors ranging from blues to reds to whites. Dimensions and lengths come in several sizes. Tongue is the ultimate accent for any log home construction.

~Rafters

They are usually 4"x8" or 4"x10" rough-cut timbers. There are four feet of spacing on centers between rafters. These timbers can be cut from spruce, lodge pole pine, or Douglas fir.
